Kadib marka aad waydiso ardayda su'aalahan oo kale iyo kuwo kale oo la mid ah ee aad ogaatid inay sii dhab ah u fahmeen ayaad bilaabi karta cashirka xiga.

Waa maxay isugeeyntu? Maxase loo isticmaala isugeeynta? Waxaad isku dayda inaad ardayda ka heshid macnaha iyo ra'iyiga ay ka qaban isugeeynta.

“ISUGEEYNTU” waa isku darka tiro oo lagu daro mid kale ama isukeenida tirooyin la isugu keeno hal tiro ah iyada oo racaayo nidaam xisaabed. Markay ardaydu sida u fahanto kadib isugeeynta dhufsaneyashuna taan uun bay la mid tahay waxaayna ugu faahfaahsan tahay buugga ardayga tusaalayashisa 1^{aad}, 2^{aad} iyo 3^{aad}. Waxaa lo bahan yahay haddi ay tusaaluhu ku yar yahay oo ay ardaydu fahmi waayan in la siiyo tusaalayaal dheerad ah si ay u fahman. Marwalba ka qaybgalka ardaydu waa muhiim geedi-socodka baris-barasho ee xoogga saraaya bahiida ardayda raac isla markaana ha loo fulinaya hab fudud oo ay fahmi karan ardaydu.

Tusaale 1: habka isugeeynta dhufsaneyasha 100leyda.

$200 + 300 = 500$ sababto ah isugeeynta 2 boqol iyo 3 boqol inay la mid tahay 5 boqol ha loo faahfaahiyo. Taasina waa $2 \text{ boqol} + 3 \text{ boqol} = 5 \text{ boqol}$. Marka tiro ahaan loo dhiggana waa $200 + 300 = 500$.

$200 + 300 = 2 \text{ boqol} + 3 \text{ boqol} = 5 \text{ boqol} = 500$. Inay sida tahay Macalinku haa ka dhaadhiciyo ardayada.

Habka kale waa habka tiro god-rugeedyada sida ku cad shaxda hoos ku qoran waxaa la isugeeynayaa godadka iyado laga bilaabayo godka koowaad.

Godka boqol	Godka toban	Godka kowaad	
2	0	0	Ama
+ 3	0	0	200
			+ <u>300</u>
			<u>500</u>
5	0	0	

$0 + 0 = 0$, $0 + 0 = 0$, $2 + 3 = 5$. Inay sida tahay Macalinku haa ka dhaadhiciyo ardayada.

Tusaale 2: habka isugeeynta dhufsaneyasha 1000.

$3000 + 1000 = 4000$, si iyada oo ku qoran xuruuf ahaan loo tuso

$3000 + 1000 = 4000$, sababto ah isugeeynta 3 kun iyo 1 kun inay tahay 4 kun uu faahfaahi ardayda. $3 \text{ kun} + 1 \text{ kun} = 4 \text{ kun}$ ha qoran ardaydu. Sidaas darteed $3000 + 1000 = 3 \text{ Kun} + 1 \text{ Kun} = 4 \text{ Kun} = 4000$. Waa in ardaydu tiro ahaan iyo xuruuf ahaanba aay u fahman oo ay u qoran.

Habka kale ee lo dhiggi karo waa habka tiro god-rugeedka ee ku cad shaxdan soo socota iyada oo god-rugeed god-rugeed u talla oo la isugeeynayo lagana bilaabayo god-rugeedka kowaad. Waana sidan:

God ka kunnaadka	God ka boqbaadka	God ka tobnaadka	God ka koowaadka	
3	0	0	0	Ama 3000
+ 1	0	0	0	+ <u>1000</u>
				<u>4000</u>
4	0	0	0	

$0 + 0 = 0$, $0 + 0 = 0$, $3 + 1 = 4$, inay sida tahyardayda haa lo sharraxo (faahfaahiyo).

Tusaalaha 3: habka isugeeynta dhufsaneyasha 100leyda iyo 1000leyda.

Si la isugu geeyo dhufsane 100ley ah iyo mid kunley ah marka hore faahfaahii in dhufsanaha kunleyda ah loo badalo (laga dhigo)boqolley. Tusaale ahaan 3000 waxaay u dhigantaa 30 boqolley (30×100) ah, 7000 waxaay u dhigantaa 70 boqolley ama (70×100) ah, IWM markad uu faahfaahisiid ardayda ka dib tusaalahan ku hogaami in ay ka shaqeyan.

$6000 + 200 = 6200$, sababto ah $6000 + 200 = 60 \text{ boqolley} + 2 \text{ boqolley} = 62 \text{ boqolley} = 6200$. Inay sida tahay waa in uu Macalinku faahfaahiyaa ardayada.

Habka kale waa samaynta shaxda qiima-rugeedyada dusheeda waxaad isugeyn astirooyinka qiima rugeed koodu insku mid yahay u faahfaahi ardayda iyada oo aad isticmalaysiid saburaada, $6 + 0 =$

6, $0 + 2 = 2$, iyada oo ay god-rugeedyada kalana ay yihiin ebber. Marka ardayda sidaas loogu sharrayo dabdeed hawlo shaqo xisaabed oo habkan ah ha la siiyo oo ha ka shaqeeyan.

Ugu dambeynta, sida ku cad buugga ardayga booggissa 54 Hawlgalka 4.1 su'aalihisa 1, 2, 3, 4, 5, 6, 7, 8, iyo lay liskal suaalaha 1, 3, 5, 7, waa inay ardaydu fasalka dhexdisa tiraab ahaan afka ha ka jawaaban.dhammaan su'aalaha kale ee hadha ha loo siiyo ardayda shaqo fasa (class work) iyo shaqo guri(home work) kadibna buuggagtooda ha loo saxo oo ha la hubiyo shaqadooda.

Daadalka loo samaynnayo ardayda bahiyyaha gaarka ah qaba

Waxaa muhiim ah geedi socodka waxbarashada dhexdeeda in firo gaar ah la siiyo ardayda bahiyyaha gaarka ah qaba ee uu bahan.

Waxaa loo bahan yahay ardayda fahankoodu xun yahay (fahankoodu liito) in marka hore la fahansiiyo isugeeynta labo god-rugeed kowaad ah, kadibna labo god-rugeed tobanley ah, kadibna labo god-rugeed kunley ah iyo ugu dambeynta isugeeynta god-rugeed boqol kunleyda la bara herarka kala duwan ee xisaabadka. Waa in laga soo bilaaba bilowga ila iyo tiroooyinka wawayn isugeeyntooda si ardaydaas uu fahanto.

Tusaal ahaan:

B. $200 + 300 =$ isugeeyntu

$2 + 3 = 5$

$20 + 30 = 50$

$200 + 300 = 500$

T. $2000 + 3000 =$ Isugeeyntu

$2 + 3 = 5$

$20 + 30 = 50$

$200 + 300 = 500$

$2000 + 3000 = 5000$

Dhanka kale ardayda fahankoodu fican yahay iyada oo aysaan ku koobanin isugeeynta dhufsaneyasha boqoleyda ah oo kaliya waa inay isugeeyaan dhufsanayaal kala duwan side dhufsaneyaasha 10 iyo dhafsa ne yaasha 100: ama dhufsana yaasha 100 iyodhufsanoosha 1000.

Tusaale ahaan waxaa la waydiin kara su'aalahan:

2. Tiro qaadasho (haysasho) [taas oo ah tirooyinka oo rug inta laga qaado rugkale lagu durkiyo].

Isugeeynta tirooyinka idil waxaay leyihiin hab-xisaabeedyo kala duwaan la raco marka ay isutagayan.

Hab-xisaabeedka caadiga (standard) waa hab-xisaabedka tirooyinka jog la isugu hoos qoro iyada oo la inku beegayo astirooyinka qiima rugeedkoodu iskumidkaah. Hab-xisaabedkannina waa hab-xisaabedka lagu (dhigayo) soo qaatay buugga xisaabta ee fasalkan 3^{aad}. kuwa kalena waxaa lagu caddeyey qayb hoosadka 4.1.5 .

4.1.2 Isugeynta tirooyin ka idil ee saddex godlaha ah

Bilaabida iyo soo jeedinta

Si loo baro ciwaanka waxbarashada waxaa ardayda loga bahan yahay inay yaqaanan:

1. Isugeeynta xaqiiqaha aasaasiga ah (wadaraha tirooyinka 1-god ah).
2. Shaxda qiima rugeedka tiroo yinka.

iyada oo ay sida tahay, hadda ka hor ayaay ardaydu ku soo qaateen fasalkoodi 2^{aad} cashirrada hab-xisaabedka tirooyinka idil. Hadaba, waa inaad murajaaco ku saamaysaan iyaga oo ardaydu koox koox tahay sii loo ogaado aqoontooda iyo kartidooda la xidhidha cashirrada ay soo qaateen iyada oo logu qorayo sabuurrada ficiilada aad uu araktiid inaay muhiim yihiin.

Ardaydu marka ay iskawar sadaan oo ay ka wada xaajoodaan islamarkaana ay ka shaqeeyaan hawshaas nakhtiinka ah dabadeed. Jawaabaha saxda ah u sheeg adiga oo u tafatiraya. Howshaas markaad sidaas ad u soo gabagabaysd da badeed waxaad bilaabi kartaa casharka cusub ee aad soo diyaarisay.

Casharka waxaad ku bilaabi oo aad gogoldhig ku nogon kara buugga ardayga bogga 54 Tusaalaha 1 ee ku saahson sida looga shaqeeyay isugeynta $423 + 142$ sidaas darteed jabuurada intaad ku qortid u faah faann sida lagu muujiya adiga talaabo talaabo ugu sharraxaya habka looga shaqeeyay.

Marka faahfaahintu ay dhammato kadib si loo xoojiyocashirka malinta waa in ardaydu fasalka ku shaqeeyan tusaalaha sida ku cad su'aalaha layliska isku soo shandheeynta tirooyinka xagga god-rugeedyadooda ama kuwa la midka ah.

Isugeynta Tiro qaadasho leh

Waa in aad tusaalooyin kala duwan aad ardayda ku fahansiisaa isugeynta leh tiro qaadasho.

B. Isugeynta godka koowaadka tiro qaadasho ku leh.

Tusaale: $617 + 175$ isugeyntan sida loogu shaqee yo haddii loo baahda sida buugga.

Ardayga loogu sharraxay ayaa sidan soo socota loogu falanqayn karaa.

xisaabin

Talaabada 1 ^{aad}	$\begin{array}{r} 617 \\ + 175 \\ \hline 2 \end{array}$	7 kowaad + 5 kowaad = 12 kowaad = 1 tobnaad + 2 kowaad 2da ku qor kowaadka 1kana ku dar tirooyinka tobnaadada.
Talaabada 2 ^{aad}	$\begin{array}{r} 617 \\ + 175 \\ \hline 92 \end{array}$	1 tobnaad + 7 tobnaad + 1 tobnaad = 9 tobnaad. 9ka ku qor tobanleyda hoostisa.

Marka faahfaahintu dhammaato kadib su'aalo la mid ah ha ka shaqeeyan.

T. Isugeynta tiro qaadasho ku leh godadka kala duwan siaad u fahansiised fasalka dhexdiisa uga shaqee isugeynta $457 + 289$ adiga oo sidan soo socota talaabooyinka u sharraxaya.

Sikastaba ha ahaatee habkan waxaa in xoogalasaaro u baahan:-

1. Tirooyinka isutagayaasha ah in midwalba loogeeyo tirada kale ee godrugeedkiisa ah.
2. Waa inay odhaah/xuruuf ahaan ku garanayaan xaqiiqaha isugaynta aasaasiga ah. (Tusaale: 2+8, 3+9, 4+7, taas oy odhaah ahaan ku garanayaan isugaynteeda oo ah godrugeedka koowaad)

Habkan oo kale iyada oo la adeegsanayo waa in lafahan siiyaa ardayda isugaynta xisaab ka kooban godrugeedyo kala duduwan.

Iyada oo ardayda kooxkoox looqaybinayo su'aalahaan soo socda ha ka shaqeeyaan

- KH. Hubi natijada isugaynta X inay tahay 617 iyo 175?

Isugaynta sidakor ku cad oo kale ugu faahfaahi tusaalaha soo socda:-

Tusaale:- si aan isugaynta 617 iyo 175 marka hore labada tiro ee la isugaynta u kala saar godrugeedyadooda kadibna

4.2.4 Kalagoynta Tiro Afar-god ah iyo Tiro kalo ka yar oo leh Amaahasho.

Maadama qayb hoosadka cashirkani tirooyinka iyo dhufsaneyasha oo badan mooye usaan ka duwaanayn cashiradi lagu soo qaatay qaybta 4.2.2 iyada oo aan waxba loo sharri xiin ardayda koox koox inta loo qaybiyohaka shaqeeyan qaybta ficiilka 9^{aad} wakhti ku filan markay ardaydu shaqeeyan halaga hubiyo inay sax uu shaqeeyeen iyo inkale. Haddi ay jira dhibaatooyin wawayn oo uu bahan faahfaahin inta cashirkan iyo cashirka kale ee 4.2.2 la isku xidho haloo sharraxo ardayda. ugu dambeynta layliska 9^{aad} ardaydu shaqo fasal iyo mid guri inta lagu kala qaybiyo hala siiyo haka shaqeeyaane.

4.3 Weedh xisaabeedyo lagaga shaqaynayo Isugeyn iyo kalagoynta

Ujeedada ugu weyn ee ciwaan hoosaadka cashirkani waa in ardayda la baro su'aalaha (hal xidhalayal) xuruuf ahaanta u qoran iyo habka loo xaliyo.

si loo xaliyo oo jawaab loogu helo weedh xisaabeed maalaha qaciido kali ah ama hal sharci oo la raaco. Hadaba, waxaa loo bahan yahay in kartida xalinta iyo xisaabinta iyo habka jawaab uu helida su'aalo xuruufeedka oo u bahan herar kartiyeed kala duwaan ee ardayga in marba marka ka dambeysa kor lo qaado.

Inkasto xalinta weedh xisaabeed ahaanta u qoran aysaan lahayn hal qaaciido iyo hal sharci oo loo maro, haddana waxaa muhiim ah in ardayga la fahaansiyo in u badali karo weedh xisaabeed su'aal xisaabeed, taas oo ah su'aal xuruufeedka oo loo badaloostaamo xisaabeedka (+, -, ×, ÷) iyo “=” ama “>” ama xiita dorsoome (variable). Ha loo sharraxo ardayda in marka hore weedha xisaabeed ahaanta ah loo badaalo astaamo xisaabeedka kadib inay fudud tahay in la xaliyo oo jawaab loo helo.

Sidaas darteed, waxaa muhiim ah in xoogga la saaro oo ardayda loogu ceelceliyo sharraxaada in marka hore weedh xisaabeedka loo badaalo astaamaha xisaabaadka kadib ay fuduudanayso in la xaliyo oo jawaab loo helo.

Si loo xaliyo su'aal xuruufeedka ah waxaa jira habab la raacowaana kuwan hoos ku cad:

Herka 1^{aad}: su'aasha oo si sax ah loo akhriyo oo la fahmo waxaa lagu waaydiyay ee loo bahan yahay.

Herka 2^{aad}: xaqaa'iqo lagu siiyay oo aad garaatid (fahantid).

Herka 3^{aad}: wax larabo (lo bahan yahay) oo aad si cad u gaaratid (fahantid).

B. Habka qayb qayb-isugu dhufashada

Habka qayb qayb isku dhufashadu waa hab taranka la rabo in la helo la raadiyo iyada oo marka hore gaybo ka mid ah taranka guud gooni gooni inta loo raadiyo dabadeedna la isugeeyo.

Si aad u fahansiisid fikradaas ardayda ku dhiirigali in ay ka shaqeeyaan Hawlgalka 9 ee ku yaala bogga 92 ee buugga ardayga. Ardaydu marka ay ka shaqeeyaan dabadeed u sharaax in qayb qayb iskudhufashada macnaheedu u yahay gooni gooni u raadinta taranada koowaadka, tobnaadka boqlaadka IWM.

Jawaabaha Hawlgalka 9

Waa in aad marka hubisaa in ardaydu ay garanayaan tirade 234 dhexdeeda in qiimaha 4 ay tahay $4 \times 1 = 4$ qiimaha 3 na ay tahay $3 \times 10 = 30$, sidoo kale qiimaha 2 ay tahay $2 \times 100 = 200$ sidaas darteed

- b. 2 marka lagu dhufto qiimaha 4 waa $2 \times 4 = 8$
- t. 2 marka lagu dhufto qiimaha 3 waa $2 \times 30 = 60$
- j. 2 marka lagu dhufto qiimaha 2 waa $2 \times 200 = 400$
- x. taranada sare marka la isugeeyo waa $400 + 60 + 8 = 468$

Sidaas darteed $2 \times 234 = 468$

Tusaale : si'aad ardayda fahamkooda u kobcisid tusaalahan ama mid la mid ah waad uga shaqayn kartaa
