Waxaa loogu billabayaa casharkan iyadoo isbarbardhigida iyo horsanaanta tirooyinka idil ee ay ku barten casharkii hore bugga baraha 1.1.2 adigoo usoo koobaya ayaad kana ubilaabaysaa.

Hawlgalka soo socda ee buugga ardayga bogga ku xusan saddex dugsi ardayda dhigata tiradoodu tahay 9545; 900 iyo 9500 ha uga shaqeeyaan iyagoo tirooyinka lammaane lammaane usamaynaya si ay isu barbardhigaan tirooyinka islamarkaana meelaha loo baneeyay ee banaan astaamaha $<$ ama $>$ ha isticamalaan si ay weedha u saxaan, su'aalaha ah sababta? - 9545 ----- 9500 waa maxay sabatu?

Sida kor ku qoran tusaalayaasha A iyo B faahfaahintooda waa maadaama tirooyinka idil godakoodu kala badan yihiin sida 900 waa saddex god oo kaliya mar walba tirada godakoodu badan yahay umbaa mar walba tirada godadkeedu badan yahay umbaa wayn. Sida tirooyinka lammaane ee ku qoran C ay yihiin kuwa godka kunaadka iyo Godka boqobadka ah ay isle'eg yihiin waxay ku kala duwan yihiin godka tobnaadka ah ee $4 > 0$. Ayaan ardayda looga baahan yahay inay sidaa ufaahfaahiyaan.

Waxaad ardayda ku howlgalisaa in tirada ardayda ee dugsiyada kala duwan astaamahaan iyagoo u adeegsanaya tirada wayn, kuwa isle'eg iyo tirada yarba astaamaha $<$, $>$ ama $=$.

$$900 \underline{<} 9500 \underline{<} 9545 \text{ ama}$$

$$9545 \underline{<} 9500 \underline{<} 900$$

Haddaba waxaa lafilayaa in ay ardaydu si dhib yar u isticmaali karaan astaamahan isbarbardhigida tirooyinka iyo horsanaanta tirooyinka oo kaliya caddayn buuxda ma noqon karto.

Su'aasha ah dugsigee ayaa ugu yar ardaydu waxay odhanayaan dugsiga ugu godka yar waa **B**.

Dugsigee ayaa isna ah dugsiga ugu tiro wayn waa dugsiga **A**. ayaa ardayda looga baahan yahay jawaabo noocaas ah inay soo goobiyaan. Fikradaas markay sidaas u fahmaan intaa waxaa kuxiga sida.

A. Tirooyinka idil ee saddex iyo Afarta god ee kala duwan leh. Tusaale 1238, 403, 845

B. Tirooyinka idil ee leh godadka iskumid ah sida 4444, 5002, 5010

Waa inaad u samaysaa arday hadba sida ku habboon iyagoo koox koox ah ama shaqsi shaqsi sidii ay tirooyinkan isugu barbardhigi lahaayeen horsanaanta tirooyinka idil adigoo kormeeraya kuna dulwareegaye hawlgalka ay kujiraan wixii khalad ahina waa inaad sabuurada ugu faahtaahisaa oo ka saxdaa.

Habkale oo Wax Barista Ardayda

Hawlgalkan waa hawlgal ku xiga isbarbardhiggii iyo horsanaanta ardayda saddexda dugsii kadib lasiin doono.

Waxaad u diyaarisaa baakidho yar yar oo ay ku qoran yihiin tirooyin kala duwan oo leh godad isku mid iyo godad kala duwanba oo saddex iyo afar godba isagu jira baakidha dan tirooyinka ku qoran isugaynayaan isbardhiga iyo horsanaanta tirada iyago saf saf ah ardaydu waa inay usheegaan (tusaan). Kooxahan ardayda koox walba sida ay horsnaanta tirooyinkan ku munjiyaan waa hab kaloo oo ardayda loo fahansiin karo lagana sixi wixii khalad ah.

Xaalada noocan waa in si degan u ilaalisaa edebdarada ama rabshada ardayda ka iman karta.

Ardayda u Baahan Qaabkale oo Kaduwan

Maadaama ay jiraan arday dadaalkooda ama heerka aqoontooda ku kala duwan waxaa muhiim ah in aad ku sisaa casharo gaar ah ardaydani dadaalka kala duwan leh. Ardayda fahan hoose leh waxaad uga billaabaysaa kolba xaaladu siday tahay adigoo uga bilaabaya isbarbardhigga iyo horsanaanta tirooyinka idil ee labada god leh. Si loo gaadhsiiyo ardayda kale ama loo kobciyo fahankooda waa inaad gododka kolba god kale ugu kordhisaa.

Dhinaca kale ardayda fahanka sare leh waxay iyaguna ubaahan yihiin qaab kale oo waxbarasho markaa iyaga inaad ugu joojiso ma'aha gododka tirooyin kan ilaa afar god hadba sida ay ufahansan yihiin adigoo u eegaya kolba god ugu biirisa shan god iyo wixii ka badan ba si. B. Isugeynta

Su'aal Sababta "Isugaynta" aan adeegsano? Iyo

Ereyga "Isugayn" waxa uu yahay?

Nuxurka isugaynta fikrado laxidhiidha waa in aad isticmaasha si aad ardayda uga hesho tusaalooyin fikrada kala duwan iyo garashadooda isugaynta.

"Isugayn" inay tahay xisaab-fal ah laba tiro marka la isu daro wadarta kasoo baxda. Ama tirooyin kala duwan marka meel la iskukeeno (daro) xisaabfal loo adeegsado in isku darida tirooyinkaas. intaa markay ardaydu gartaan kadib si aad u fahansiiso dhufsanayaasha 1000; 10,000 iyo 100,000 isugayntoodu ka duwanayn sida kor kuxusan ayaad sabuurada ugu qoraysaa adigoo u sharaxaya tusaalayaasha ku qoran buugga ardayga ee tusaale 4, tusaale 5, tusaale 6. Haddii ay tusaalayaashaasi ku filnaan waydo waxaa habboon ama laga maarmaan ah in loo sharaxo tusaalooyin kale oo la xidhiidha ilaa ay ka fahmayaan.

Sida tusaale 4 lagu siiyey dhufsanayaasha 1000 (1 kun) isugaynta xisaab-falkooda.

$1000 + 2000 = 3000$ sababtoo ah adigoo tusaya shaxda qiima rugeed godadka ah ee ku qoran ayaad u sharaxaysaa in qiimaha godadka isku mid ah la isugaynayo sidan.

$$1 + 2 = 3$$

$$0 + 0 = 0$$

$$0 + 0 = 0$$

$$0 + 0 = 0$$

Tusaale 5 waa isugaynta dhufsanayaasha 10,000 (toban kunaadka)

$10,000 + 30,000 = 40,000$ adigoo tusaya qiima-rugeedka godadka sida shaxda ku qoran usoo gaabi sidan $1 + 3 = 4$ tirooyinka godkakale maadaama ay eber yihiin isugayntooduna eber inay fahan sii.

Sida tusaale 6 ku qorana waa isugaynta dhufsanayaasha toban kunaadka iyo boqolkunaadka.

$700,000 + 70,000 = 770,000$, sababtoo ah adigoo tusaya sida shaxda ka muuqata ugu soo gaabi

$$7 + 0 = 7$$

$$0 + 7 = 7 \quad \text{Isugaynta godadka kalena waa eber.}$$

Kadib marka tusaalooyin kaas ardayda aad tustay kadib sii ardayda shaqooyinkale oo dheeraad ah.

Ugu dambayna buugga ardayga bogga __ layliska 1.2.B su'aalaha ku qoran qaarka mid ah sida a: b: c fasalka gudiisa ku waydii ardayda inay ku dhawaaqaan jawabtooda. Layliska 1.2c su'aalaha ku qoran a: b: c: uga dhig shaqo fasal adigoo kadib jawaabtoodana usaxaya.

Su'aalaha kale ee hadhsan ardayda u sii shaqo guri kadib xiisada ku xigta u sax adigoo kuna dhiirigalinaya.

Si qiimaynta joogtada ah ugu samayso ardayda adigoo raadinaya ujeedooyinka casharka inay hirgashay ayaad su'aalaha soo socda sabuurada ugu qoraysaa si ay uga jawaabaan.

T. Kalagoynta

Ereyga “**kalagoynta**” muxuu yahay? Maxaan u adeegsanaa? Fikirka ay uleeyihiin kalagoynta iyo sababta aan u adeegsano ku ardayda inay wax ka sheegaan.

“**kalagoyn**” waa xisaab fal aan u adeegsano marka tiro idil laga jarayo tiro idil oo ka yar inay tahay markay ogaadaan kadib, kala goynta dhufsanayaasha 1000, 10,000 iyo 100,000 inaynan ahayn si ka gadisanfahansi oo tus. Sida buugga ardayga ku qoran tusaalayaasha 7 iyo 8 faahfaahintooda sabuurada ugaga shaqee. Tusaalooyinka hadday ku filaan waydo tusaaleyaal dheeraad ah sii.

Dhiiri galin ku sii iskaashiga iyo doodka ay ku sameeyeen hawlgalka kala goynta ee fasalka gudahiisa.

F.G:- maadaama ay ardaydu fahankoodu kala duwan yahay waa in ardayda hadba qaabka ay ufahmayaan ugu kala adeegsataa.

Adigoo wanaajinaya, jeclaysiinaya islamarkana xiiso galinaya ardayda waa inaad kuwo fahankoodu liito su'aalo fudud oo ay ka shaqayn karaan siisaa, halka kuwa kalena aad ka siiso su'aalo u dhigma maadaama uu fahankoodu sarreyo.

Tusaale:- Ardayda fahankoodu degdega yahay tiro godad badan sii dhinaca kale ardayda liidata sii tiro godkeedu yar yahay.

Tusaalaha 7:- sida ku qoran

$$3000 - 1000 = 2000 \text{ sababtoo ah } 3 - 1 = 2, \text{ tus ardayda qiima-ruggeedka shaxda ku qoran.}$$

Tusaalaha 8:- sida ku qoran

Qaababka Kale Waxbarista

Markaynu taxayno iyo waliba markaynu kalagoynayno tiroonka 1000, 10,000 iyo 100,000 waxaad adeegsan kartaa abaakas.

a) Tusaale 6 sida ku xusan tusaahaha isugaynta ayaad tusi kartaa

$$700,000 + 70,000 = \underline{\hspace{2cm}}$$

700,000

70,000

b) Tusaale 8 sida ku xusan tusaalaha kalagoynta sidan hoosku qoran ayaad u tusi kartaa

500,000

100,000

400,000

Abaakaska waxa uu yahay iyo waxa laga sameeynkaro ayaa shaqofasal 1.1. faahfaahin fiican lagu siiyey.

Sida Kutaalla A Fallaadha

Abaakaska labaad godadka 10,000 goobooyinka ku jira intuu ka saaray ayuu abaakaska koowaad ee godka 10,000 ayuu ku daray. Labada abaakas goobooyinka ka muuqda waxaa lagu arki karaa abaakaska saddexaad.

Sidaa daraadeed abaakaska labaad waxaad si fiican ugu arkaysaa isugaynta dhufsanayaasha $70,000 + 700,000$ inuu jyahay 770,000.

Fallaadha b Sida Ka Muuqata

Abaakasta koowaad 500,000 ayaa ka muuqata.

Abaakasta labaad 100,000 ayaa ka muuqata.

Abaakaska labaad godka 100,000 hal wareeg ayaad laga qaadayaa. Marka hal wareeg uga qaado 4ta wareeg ee soo hadha waxay caddaynay saa 400,000.

Sidaa daraadeed $500,000 - 100,000 = 400,000$ maadaama ay tahay abaasta saddexaad aad ayey u muuqataa.

Ardayda u baahan qaababka kala kuwan ee waxbarista.

Ardayda inkastoo heerarkooda ay kala duwan yihiin waxay u baahan yihiin iyadoo heerarkooda lagu sallaynayo loogu fahansiiyo godadka tirooyinka. Ardayda fahanka yar godod yar, kuwa kalena godadka loo biiriyo

Buugga ardayga bogga 8 sida kuxusan layliska 1.2T markay kaga soo shaqeeyaan gurigooda kadib dhiirigalin ku habboon waa in aad siisaa.

Kuwa degdeg uu yahay fahankoodu tirooyin ka dhufsanayaasha 10000, 10,000 isugaynta iyo kalagoyntaba, kuwa liitana godadka loo yareeyo ayaad su'aalo ka waydiinaysaa. Su'aalahan soo socdana fasalka gudahiisa ku sii si ay kuugu noqoto qiimayn Joogta ah.

Sida tusaalaha sare aad kusoo aragteen in la isku geeyo laba tiro oo idil:-

1. Marka ugu horaysa waa in tirooyinka idil midba midka kale qiimaha godka ku haboon ugu hoos taxno ama hoos dhigno.

6.2.2. Halbeega Wayn Oo Loo Badalo Cabbirka Halbeeg Yar Ee Wakhtiga

Cinwaanka 6.2.1. marka aad bilawdiin cabbirka halbeegyada wakhtiga oo loo badalayo halbeega wakhtiga ee ugu yar

Ardaydu waa in ay u fiirsadaan, 1 maalin waa 24 saac marka layidhaa waa maalin oo loobadalay sacad ahaan si la mid ah daqiiqo waa 60 ilbiriqsi marka laleeyahay waa daqiiqada oo loo badalay ilbiriqsi ahaan in ay awoodeen ayay tilmaamaysaa, faahfaahiintan

Marka aad usheegtaan kadib si toos ah hawlgalka 6.2b ardaydu iyaga oo islafadhida ay ka doodaan in ay ka shaqeeyaan waa in lafaraa.

b. haddii 1 saac ay tahay 60 daqiiqo, badhkeed waa imisa daqiiqo?

t. rubuc saac amaa 1 saac oo loo qeybiyey 4 waa imisa daqiiqo?

j. haddii hal maalin ay tahay 24 saac maalin badhkeed waa imisa saac?

Si lamid ah sidan hawlgalka 6.2.b. in ay uga shaqeeyaan ku dhiirigali kooxaha marka aad ka ururiso jawaabahooda kadib adigu jawaab celin ilaa furfiristooda waa in aad siisaa.

Jawaabaha hawlgalka 6.2b.

b. 30 daqiiqo t. 15 daqiiqo j. 12 saac

iyada oo la siiwadayo buugga ardayga tusaale 3aad ee lagu xusay ardayda si wada jir ah su'aal iyo jawaab dhaan ilaa furfuristeeda waa in aad tustaa.

Tusaale 13 daqiiqo marka loo badalayo ilbidhiqsi ahaan

1 daqiiqo = 6 ilbidhiqsi maadaama uu yahay

13 daqiiqo = 13 meelood oo min 60 ilbiriqsi

Sidaas awgeed daqiiqada marka loo badalayo ilbidhiqsi waa daqiiqadaha lagu siiyey oo lagu dhuftay 60, si lamid ah saacada marka loo badalayo daqiiqado waa saacadaha lagu siiyey oo lagu dhuftay 60, maalin marka loo badalayo saacadona waa maadhin oo lagu dhuftay 24

Kuwan si ay u xasuustaan si iskumid ah in aad ugu sheegto way ku haboontahay, iyada oo laga siigudbayo ardayda koox-koox fasalka dhaxdiisa iyaga oo ah shaqo – kooxeedka 6.26 in ay ka shaqeeyaan waa lakaraa. Sidaas darteed 2 maalmood = 2880 daqiiqo

t. 12 saac = 12×60 daqiiqo = 720 daqiiqo

720 daqiiqo = 720×60 sakondhi = 43,200 ilbiriqsi sidaas darteed 12 saac

= 43,200 sakondhi

j. maalin rubuceed = 1 maalin \div 4 = 26 saac \div 4 = 6 saac

6 saac = 6×60 daqiiqo = 360 daqiiqo

360 daqiiqo = 360×60 sakondhi = 21,600 ilbiriqsi

Layliska 6.2b arday waliba waa in uu shaqsi ahaantii uga shaqeeyaa, ka horey u dhameeyaa waa in aad u saxdo, haddii ayna saacadu ku filnayn shaqo guri ahaan usii. Dhamaan ardayda waa in aad u
